

DEHYDRATED AMNIOTIC MEMBRANE SHEET

PROTECTIVE COVERING TO
AID IN WOUND MANAGEMENT

WHY AMNIOTIC MEMBRANE?

Human amniotic membrane forms the innermost layer of placenta tissue. The thin and avascular membrane acts as a protective barrier for the developing fetus. Its properties provide a wide variety of potential benefits in regenerative medicine.

PROTECTIVE COVERING

The membrane sheet provides a protective covering that aids in wound management

IMMUNOGENICITY

The amniotic membrane has unique immunological properties, which will not trigger immune rejection¹

SCAFFOLD

The extracellular matrix acts as a scaffolding and potentiates the migration and adhesion of resident cells²

GROWTH FACTORS

Natural cytokines in the membrane aid in its regenerative and protective traits³

WHY SURGRAFT®?

Lightweight and flexible, providing a protective covering and ease of use while reducing bulk at the site.

SurGraft® is produced with unparalleled quality standards. Our process extracts the membrane from the placental tissue, leaving only the amniotic membrane layer which is then dehydrated into a sheet-like product. SurGraft®'s minimally manipulated process retains the natural properties of the amniotic membrane, and provides clinicians with a flexible sheet that can be used in a variety of treatment applications with ease.

- Rigorous quality and serological testing exceeding FDA requirements
- Single layer of amnion to prevent bulk at the site and provide maximum flexibility
- Variety of sizes tailored to your specific needs

Product Information

Learn more about SurGraft[®]

SurGraft[®] is regulated under Section 361 of the Public Health Service Act and is intended for homologous use.

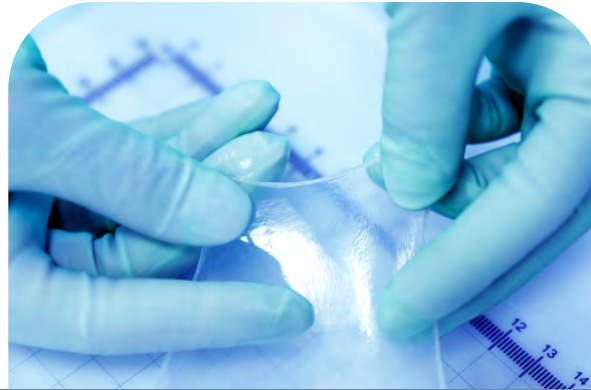

SurGraft[®] Applications

- + Podiatry
- + Wound Management
- + Orthopaedic Surgery

What is SurGraft[®]?

SurGraft[®] is a dehydrated amniotic membrane allograft intended for homologous use. It is terminally irradiated and provided in multiple sheet sizes to provide maximum flexibility for a variety of clinical applications.

Amniotic Membrane Sheet

Potential SurGraft[®] Benefits

- Flexible
- Protective Covering
- Non-Steroidal
- All-Natural
- Single-Layered

Is SurGraft[®] Safe?

SurGraft[®] is thoroughly tested for safety. We pride ourselves on safety standards that exceed regulatory requirements by performing additional serological and endotoxin tests often missed by our competitors. SurGraft[®] was also shown to be effective in treating chronic Diabetic Foot Ulcers during a 10 patient case series, when compared to traditional standards of care.

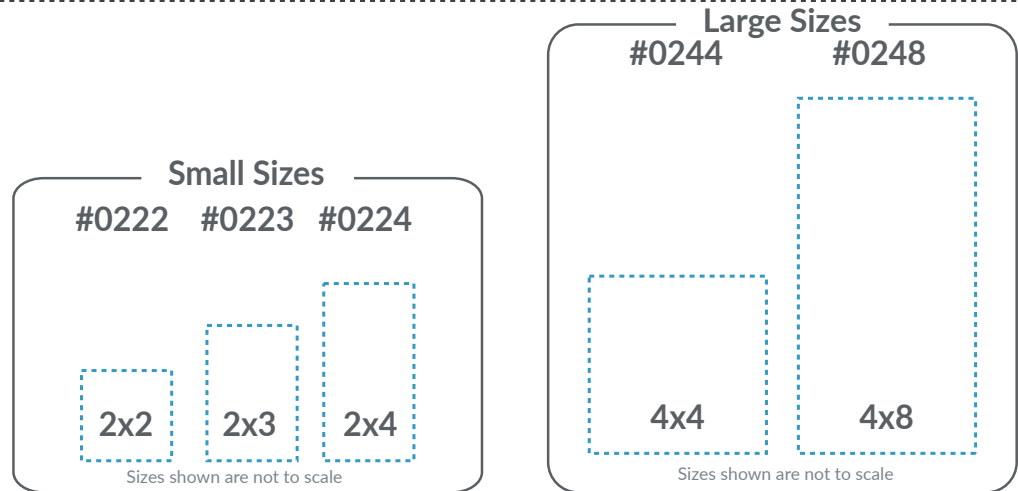

Sheet Sizes

SurGraft[®] comes in a variety of sheet sizes tailored for ease of use

Optimized For Flexibility

Since amniotic membrane can be used in a wide variety of applications, we offer sizes specifically designed to meet the needs of providers.
