

OCULAR AMNIOTIC MEMBRANE ALLOGRAFT

BIOLOGICAL PROTECTIVE COVERING TO
AID IN OCULAR HEALING

WHY AMNIOTIC MEMBRANE?

Human amniotic membrane constitutes the innermost layer of the placental tissue, and consists of a single layer of cuboidal epithelial cells firmly adhered to a thick basement membrane. Its benefits and properties provide a wide variety of therapeutic applications in regenerative medicine.

SCAFFOLD

The scaffold of the ECM helps in the migration and adhesion of resident cells

GROWTH FACTORS

Natural cytokines in the membrane aid in its regenerative and anti-inflammatory traits

PROTECTIVE COVERING

The membrane sheet provides a protective covering that aids in wound management

NO IMMUNE HEALING RESPONSE

The dehydrated membrane is irradiated and acellular resulting in no immune response

WHY SURSIGHT®?

Lightweight and flexible, providing a protective covering to aid in ocular healing.

SurSight® is specifically formulated to be smooth and clear for ocular applications. SurSight®'s minimally manipulated process retains the therapeutic properties of the amniotic membrane, and provides clinicians with a flexible sheet that can be used in a variety of treatment applications with ease. SurSight® is produced with unprecedented quality which is defined by our tightly controlled quality during production.

- Rigorous quality and serological testing exceeding FDA requirements
- Single layer of amnion to provide a smooth transparent finish
- Variety of sizes tailored to accommodate unique therapeutic use

Product Information

Learn more about SurSight[®]

SurSight[®] is regulated under Section 361 of the Public Health Service Act and is for homologous use.

Potential SurSight[®] Applications

+ Ophthalmology

What is SurSight[®]?

SurSight[®] is a dehydrated, minimally manipulated, amniotic membrane allograft for homologous use. It is shelf stable and provided in multiple sheet sizes to provide maximum flexibility for a variety of clinical applications.

It has been specifically processed to generate a smooth, transparent finish ideal for ophthalmic applications. Our proprietary processing methods yield an irradiated product that is shelf-stable and safe for use.

Amniotic Membrane Sheet

Potential SurSight[®] Benefits

- Exceptional Clarity
- Smooth Finish
- No immune rejection
- Protective covering
- Non-steroidal
- All-Natural

Is SurSight[®] Safe?

SurSight[®] is thoroughly tested for safety and efficacy. We pride ourselves on safety standards that exceed regulatory requirements by performing additional serological tests missed by our competitors.

Allograft Sizes

SurSight[®] comes in a variety of circular allograft sizes tailored for therapeutic ease of use

Optimized For Clarity

Since amniotic membrane can be used in a wide variety of applications we offer sizes specifically designed to meet the needs of our providers.
